## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 5 recites the limitation "the second logic gate". There is no previous recitation of this limitation; therefore, there is insufficient antecedent basis for this limitation in the claim.

### ***Claim Objections***

3. Claim 11 is objected to because of the following informalities: 'the first signal' should be 'the first signal'. Appropriate correction is required.

### ***Allowable Subject Matter***

4. Claims 1-4,6-8,9-10 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter: The primary reason for the allowance of claims 1-4 is the inclusion of the limitation 'providing a first signal when a halt signal and a non-interruptible code signal occur together, and a memory unit for storing the first signal, the first signal indicating a non-returnable interrupt of the executing procedure'. The primary reason for the allowance of claims 6-8 is the inclusion of the limitation determining when a halt signal occurs during a non-interruptible portion of the executing code, and storing a non-returnable bit in a memory location accessible to testing device'. The primary reason for the allowance of claims 9-10 is the inclusion of the limitation 'a logic unit responsive to

the halt condition and a control signal for generating a halt trigger signal during a non-interruptible code portion; and a storage unit for storing a non-returnable bit in response to the trigger halt signal'.
